ANTE-ROOM ECHOES.

Change in the Government of Scottish Rite Masons.

Meeting of the I. O. O. F. Supreme Grand Lodge at Portland—K. of P.—A. O. U. W.

The season in secret society orders is now beginning to open up. Although the actual amount of work done the past week was not very great, there is no doubt that in a week or two things will begin to boom. The campaign of the winter will be vigorous and aggressive. The charitable work to be engaged in will be on a larger scale than ever. A good many of the orders are also making arrangements to give courses of literary and social entertainments which will add greatly to the general attractiveness of their meetings.

A. F. and A. M.

A change in the manner of government of the southern jurisdiction of the Scottish Rite Masonry is at present under discussion. Washington, D. C., is the headquarters of the movement. In the United States there are two jurisdictions of Scottish Rite Masonry, the northern and the southern. In the former the chiefs have always been chosen by a vote of the subordinate lodges, whilst in the latter the leaders have been self-perpetuating and chosen by themselves with a life tenure. The northern jurisdiction had headquarters at New York, and comprised the states as far west as Ohio and west to the Missouri river. The southern jurisdiction occupies the remainder of the territory, with headquarters at Washington, D. C. Up to his death, two years ago, General Albert Pike was the grand commander of the southern jurisdiction, and his successor has not yet been appointed at Washington. The prevailing sentiment is in favor of the change, and it is exceedingly likely that the time-honored custom will be discarded, and that only the grand commander, but all officers of the supreme council of the southern jurisdiction will be chosen by election of the subordinate lodges, after the manner followed by the northern jurisdiction.

The meeting of the supreme lodge at Portland, Or., held this week, was the center of attraction to all Odd Fellows in the country. There were over 30,000 of the order assembled there from every part of the United States and from Canada. The delegates from Salt Lake have not yet returned, but from all accounts they are well pleased with their visit to the city on the coast and with the result of the deliberations of the patriarchs. The capability of the city to entertain so large an assembly was taxed to its utmost, but it was well done and demonstrated that the Portland lodge is not behind in their hospitality.

Odd Fellows.

The meeting of the supreme lodge at Portland, Or., held this week, was the center of attraction to all Odd Fellows in the country. There were over 30,000 of the order assembled there from every part of the United States and from Canada. The delegates from Salt Lake have not yet returned, but from all accounts they are well pleased with their visit to the city on the coast and with the result of the deliberations of the patriarchs. The capability of the city to entertain so large an assembly was taxed to its utmost, but it was well done and demonstrated that the Portland lodge is not behind in their hospitality.

In local circles there has not been any great amount of activity. On Monday night Jordan lodge met and transacted routine business only. On Tuesday evening a good meeting was held at the lodge. The following officers for the ensuing term: W. J. Moore, chief patriarch; G. W. Jewett, high priest; J. M. Brown, senior warden; F. F. Grant, junior warden; H. W. Edwards, secretary; J. Thomas, treasurer; A. Hollander, trustee.

Enterprise, Ridgely, Utah, Salt Lake and Fidelity lodges all met, and conducted routine business only. Naomi Rebekah degree lodge met on Saturday evening and enjoyed a pleasant session. The proceedings were interspersed with songs, recitations and speeches, and altogether a very pleasant time was spent.

The matter of merger is one which is creating considerable discussion just now in the order. The last issue of the Utah Odd Fellows has the following to say on the subject:

"A subject which has, and will continue, to receive considerable attention, is the matter of merger between lodge and encampment, or encampment and militia. The first proposition has been before the order more or less prominently from the time when by cutting the lodge in two, the encampment branch was created. With two branches established within the last decade, there is a growing belief that a concentration in some shape of the bodies mentioned may be conducive to the best interests of the order. Hence, let us briefly consider each."

"In the old time work, the encampment degrees were conferred by a system known as floor work, and that of the lodge by lectures, in which the ritual was ever present. The latter was evolved into floor work, fully equal to the encampment. The system of dues and benefits in the two branches is the same; hence the time of demarcation between the two is no more pronounced than between any two degrees. The machinery of encampment organization, in current expenses, costs approximately half a million dollars per year. The benefits derived, which could not be handled quite as well, perhaps better in the lodge, are the honors of office."

"We admit, without argument, that the brothers who receive the rank of P. C. P. and P. G. F. are worthy of such honors, though in many a debatable question as to whether half a million dollars per year, more or less, is too high, or not enough for the order to pay for it."

Knights of Pythias.

The dedication of the Knights of Pythias temple, which was to have taken place last Thursday evening, was postponed until the middle of October, as some of the most prominent officials were unable to attend on the date originally fixed and also because the time was too short to make the necessary arrangements for so important an event. About the 15th of October the temple will be dedicated with appropriate ceremonies.

Caliente lodge met on Monday evening. The attendance was very satisfactory and a pleasant time was had. Myrtle lodge, on Tuesday, had a good meeting and conferred the third rank on six candidates.

Rocky Mountain lodge, on Thursday, celebrated its tenth anniversary in a quiet way. There was a large attendance of the members and a very agreeable social time was spent. New applications for membership were received and will be dealt with in due course.

Joy Temple Pythian Sisters met on Thursday afternoon and conducted the usual business of the lodge.

A. O. U. W.

On Thursday evening six juniors were created full-fledged Workmen in the Salt Lake Valley lodge No. 12. Their names are: James Joshua Hardman, Walter Henry Moore, Albert Edward Brant, William Cook, William Henry Taylor, and Matthew Peter Hanks. They all took their typical voyage in heroic style, but with a determination to see some one else take the same voyage. The ceremony was held on Thursday evening, and the interest increases with every convention of the members, and there is a lesson at work which will result in a rising majority for the new jurisdiction next December. There is considerable inquiry on the outside concerning the aims and objects of this grand benevolent order, and there is little doubt that an immense following will be reported in the near future.

Ontario No. 1, at Park City, will celebrate its anniversary on the 25th, when Grand Recorder Thorburn is expected to deliver a lecture on the principles of the A. O. U. W.

The aims and objects of the A. O. U. W. are:

- 1.—To embrace it in its membership and give equal protection to all classes and kinds of labor, mental and physical, to the time-honored custom, by the intellectual and social condition of its members, to endeavor, by wholesome precepts, fraternal admonitions and substantial aid, to inspire a due appreciation of the stern realities and responsibilities of life.

2.—To create and disburse a fund to the beneficiaries of its deceased members as they may, while living, direct; thus enabling them to protect their families against want.

3.—The adoption of such secret work and means of recognition as will insure the protection of its members wherever the order may exist.

4.—To listen to lectures, read essays, discuss new inventions and improvements, encourage research in art, science and literature, and, when practicable, maintain a library for the use of its members.

The Sons of St. George held their regular meeting last Wednesday evening at the Temple of Honor hall, and the Sir Knights settled down to business very energetically, going through about two hours of work arranging the program for their autumn season. Two applications were submitted on that of Robert H. Raymond and William H. Edwards, and one member was initiated into the mysteries of the order—Philip Goodwin—thereby casting in his lot as a full member of the Sons of St. George. The next meeting will take place Oct. 5, and will be held at the first meeting of the program will do their very utmost to entertain all Sir Knights and their friends, and to make the evening a most enjoyable one. The club hopes to see these social meetings well attended during the winter. The intention is to make them interesting, although they will have Scottish characteristics; they can be enjoyed by both our American and English friends. Historical sketches, reading in dialect, songs, American, English, Irish and Scotch, a cordial invitation is extended to all friends.

There is a committee now looking into matters connected with a party to be given on Halloween.

Chief McDowell being absent, Chiefs Moffatt and Greivis presided.

"Ye carry Scots come give us a'."

"We'll make ye welcome and an' so."

Star of Bethlehem

Myrtle lodge No. 1 met on Monday evening. The time was chiefly occupied in a social way. The opening and closing exercises were practiced, so as to make the

members more proficient. It is the intention of the lodge to give a series of entertainments during the winter months, and for that purpose a number of text books of plays, dialogues, etc., have been bought. At the meeting on Monday night the following program was carried out:

Address, Eminent Commander Burgen. Reading, J. Barnaby. Song, W. Barnaby. Reading, J. E. Darnier. Song, H. A. W. Taylor. Song, Miss Hutchings. Song, Brother Barnaby.

The next meeting will be held tomorrow night, and as it is the quarterly meeting, important business will come before the lodge and a large attendance is requested.

Temple of Honor.

This order held its regular meeting on Thursday evening. The attendance was good, and a pleasant hour and a half was spent. Brother S. Hanks presided, and a lively interest was taken by the brethren, most of whom took part in the discussions on business matters which came up. A number of songs and recitations were given, and a general good time was had.

CARBON CITY.

A Live Coal Town on the line of the Union Pacific.

Correspondence of THE HERALD.

Carbon is located about 189 miles east of Green River on the line of the Union Pacific, and as its name implies, is essentially the centre of a coal region. It dates its history back to the early construction of that great civilizing agency, the Union Pacific railroad, early in 1892. It was a barren waste, but in April of that year the freight trains were opened, and a few huts and dugouts constituted the town. When the railroad made its advent, the company began buying up and developing all the best coal mines in the vicinity, building company houses, a depot, etc., and the real growth began. The town has been burned out twice, but with phoenix-like life it has rebuilt, and is today one of Wyoming's principal cities, having churches, schools, societies and libraries, mercantile and professional representation, making on the whole a very pleasant and wide awake city. It is incorporated, Hon. L. P. Pomeroy being mayor, a gentleman and a Democrat. We take pleasure in noting the following representative firms who have their headquarters at Carbon:

DR. L. POMEROY.

Dr. L. Pomeroy is the mayor of Carbon—a gentleman and a Democrat. He is a man of executive ability in his municipal position, is recognized as being one of the foremost citizens in promoting any scheme for the advancement of Carbon, and is the practicing physician in Carbon and surrounding country. He has worked up a very large practice by his ability as well as his affable and courteous manner.

SCANTON HOUSE.

To the journeyman in any town or city the question of provender is the first one of importance. The writer on making these inquiries was referred to the Scanton House and of course this was the first place struck. The present "mine host" is Mr. O. H. Archer, whose eyes seem all-seeing as regards the comfort of his guests; he and his better-half oversee the house and the kitchen, and the bill of fare that is unrivaled in the state and still is reasonable. The rooms are fitted with elegant and well kept clean appointments in every detail. We agree with others that the Scanton House is now in the best hands that have undertaken to engineer the hotel and restaurant. Mr. Archer on the success of his venture.

FRED P. SHANNON'S DRUG STORE.

The drug store is engineered by Fred Shannon, a gentleman who has been identified with Carbon for the past eight years as a druggist and some time previous as a bookkeeper in the Beckwith Commercial company. Mr. Shannon is one of the most popular citizens of Carbon, both commercially and socially. In addition to his drug business he carries the exclusive stationary stock and news depot in town and among other things, the Herald will grace his counter. His stock of drugs is also complete in every respect.

CARDWELL'S LIVESTOCK STABLE.

is the exclusive live and feed stable of Carbon. The proprietors, Messrs. Cardwell Bros. & West, are all young men, chock full of energy, who keep the very best to be had, take good care of a team and are always prepared to furnish any thing you want from a kyrie to a fine horse and buggy; they furnish transportation to all the surrounding towns, mining camps also, and are also agents for the Union Pacific Coal company. Union Pacific Coal company's carbon store, as its name implies, is located at Carbon, and is the business recently owned by the Beckwith Commercial company, the change having occurred on Aug. 1. The business was first established some fifteen years ago. The goods carried are all that are usually included in a full line of general merchandise. The store makes a specialty of miners' supplies. The store is one of the largest in the county and is managed by Mr. George F. Doane, who is so well known in Carbon that his friends are legion. He fully understands all the intricacies of mercantile life, knows how to treat his customers as also his employees, hence is a valuable acquisition to the business.

They carry about \$30,000 stock and have an immense trade from the coal mines and contiguous ranches.

MR. G. W. MORGENTHAU.

is the general manager of the Union Pacific Coal company, whose gigantic interests include all the Union Pacific coal mines in Wyoming, Colorado and Utah (at Scofield). His grasp covers all the minute details of even their commercial interests, an almost herculean task, but still not one beyond the capacity of Mr. Morgenthau.

Dew Drop can goods are the best. The best is good enough. ROGERS & CO.

THE WORLD OF LABOR

Echoes from the Workshop and the Busy Mill.

INDUSTRIOUS FOLKS' GOSSIP.

News and Happenings of Special Interest in the Fields of the Mechanic and Artisan.

Blind men tune pianos. There is a buckwheat trust. Dairy schools are spreading. Beer mugs are of aluminum. Chilean money is pasteboard. A Pullman coach costs \$30,000. A prince drives a Moscow cab. Killarney is paved with marble. A Zulu prince is an Ohio waiter. Frisco Chinese refuse to register. Chester, Ill., has female butchers. Uncle Sam has 478,350 telephones. A sheep costs \$1 cents at Antonio. Louisiana uses molasses for fuel. Flour is \$10 a ton in New Zealand. Flat irons are heated by electricity. Long Island has a Chinese farmer. The ship Texas will cost \$3,000,000. India has the largest masonry dam. Our telephone employ 4,465 persons. Germany eats American dried apples. Germany raises 250,000 canaries a year. England has a 125-year-old grape vine. Rubies are more valuable than diamonds. Ireland has 40,000 one-room mud cabins. Kansas has twenty-two women editors. A device registers the weight on scales. Brick is made from chipped granite and clay.

New York Italians have a fruit exhibition. We mined 10,000,000 barrels of salt in 1891.

A New South Wales bank owns 8,500,000 acres.

In Canton 300,000 people live in house boats. Australia has the longest rope—10,670 yards.

A Texas woman runs a 700,000 acre ranch. America has fifty-three telephone companies.

A New York clock contains 34,000 pieces of wood. The wealth of the United States is \$63,645,000,000.

New Zealand miners have furnished \$250,000,000 of gold.

Corsets sold for a penny at Zanesville, O., during a civil war.

In Brunswick, Germany, they feed cattle on the surplus asparagus.

The editor of the Yarmouth Herald has died after sixty years.

For every 4 shillings spent in England on drink only half-penny is expended on education.

The railroad dining cars in this country earn more money than the sleeping and baggage cars together.

The railway companies of the United Kingdom pay \$2,500 a day as compensation for injuries done to passengers.

There are more Jews in three of the twenty-four wards in New York city than in the whole of Great Britain and Ireland.

French florists are cultivating a plant which bears a flower that is white in the morning, red at noon and blue at night.

A Riverside, Cal., paper is authority for the statement that California fruit is sold for less price in London than in Riverside.

Aluminum is practically unattacked by fruit juices, condensed milk and the various constituents of preserved meats and vegetables.

The highest viaduct in the world has just been erected in Bolivia, over the river Lea, 9,838 feet above the level of the sea and 4,005 feet above the river.

Fourteen first-class railways now in the United States are German built, one from France, six from the Clyde, two from Belfast, and one from the Moray.

Within the memory of men now living, we've passed from the primitive schooner to the Pullman car, and from the tallow candle to the electric light.

Nitric acid will produce a black spot on steel—the darker the spot the harder the steel—while on the contrary, remains bright if touched with that acid.

The population of the United Kingdom may roughly be divided into two parts, one-fifth and four-fifths. The one-fifth contains the rich, the four-fifths the poor.

A laborer named Holtzman has celebrated his eightieth birthday at Breda, in Hesse, and asserts that he is as spry as he was forty years ago. At any rate he has not yet given up work.

No whistles are used by the carriers in London. Instead they use postmen's double knock, which is made by giving two distinct raps on the door. Every door is provided with a knocker.

An engineer resident in Glasgow has, after nineteen years' labor and experiment, devised an arrangement in an engine by which he returns all the steam back to the boiler after doing its work in the cylinder.

Platinum vessels for concentrating acids are now made on an improved plan, the new feature being that of coating the platinum with gold. Such a coating, it is found, adds materially to the life of the vessel.

Railroad time is rapidly getting down toward the mile-a-minute rate. The European state express has just beat the record, making the trip from Albany to Syracuse, a distance of 145 miles, in 107 1/2 minutes. Five minutes were taken in the stop at Utica, making the time really one mile per minute.

THE FAIREST WOMEN

ARE THOSE WHO USE

MRS. GRAHAM'S

Cucumber and Elder

Flower Cream.

Makes the skin clear and smooth and white. As soft and velvety to the touch as a baby's skin. Protects the skin from wind and sun. Black heads or pimples never come while you use it. Keeps the skin moist and elastic so that wrinkles never form. Cleanses the face far better than soap and water. Price \$1.00. Bottle lasts three months. All druggists sell it.

SAMPLE BOTTLE mailed free to any lady on receipt of 10 cents in stamps to pay for postage and packing. Lady agents wanted.
